

Collage is a way
of building
intuitive capacity
through...

... opening up...

... paying close attention...

... adding on to the actions of others...

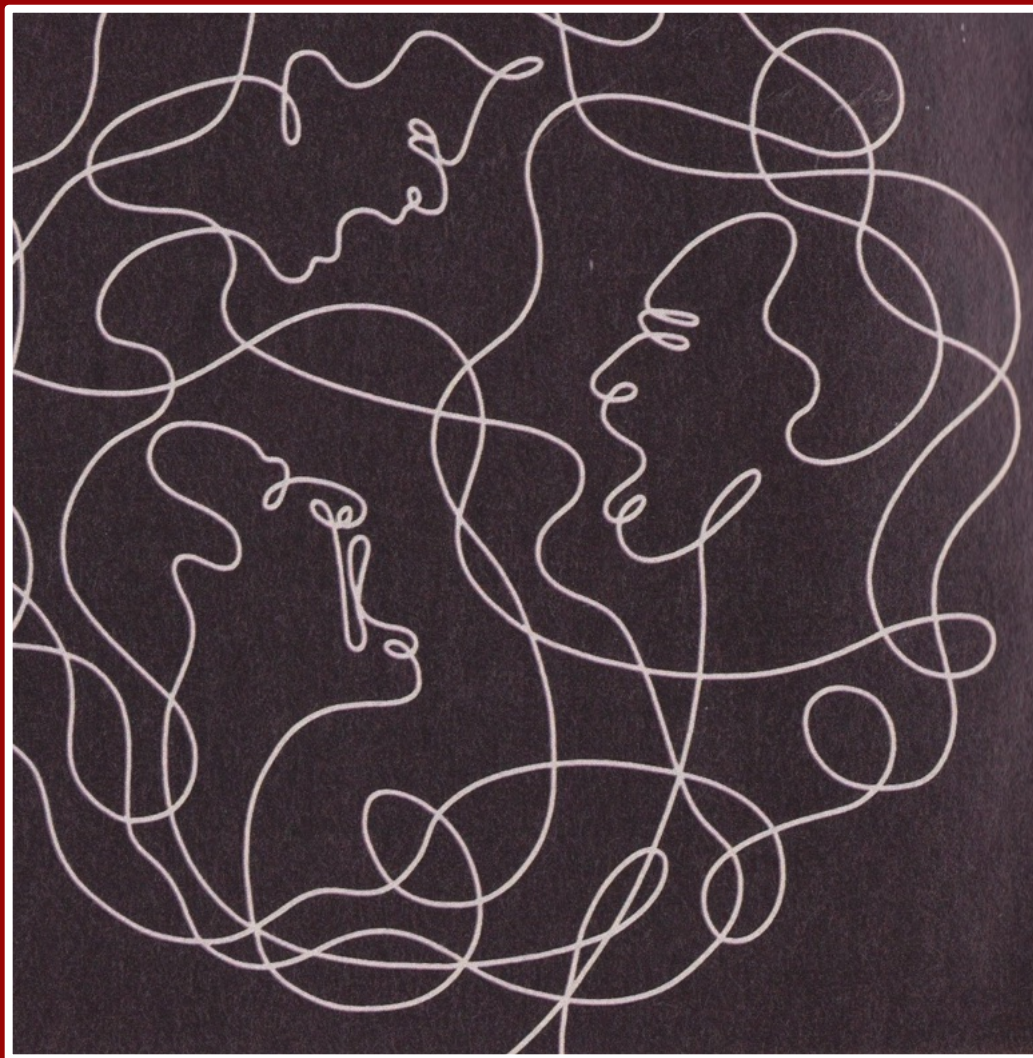

... seeing connections...

... unravelling what is complicated...

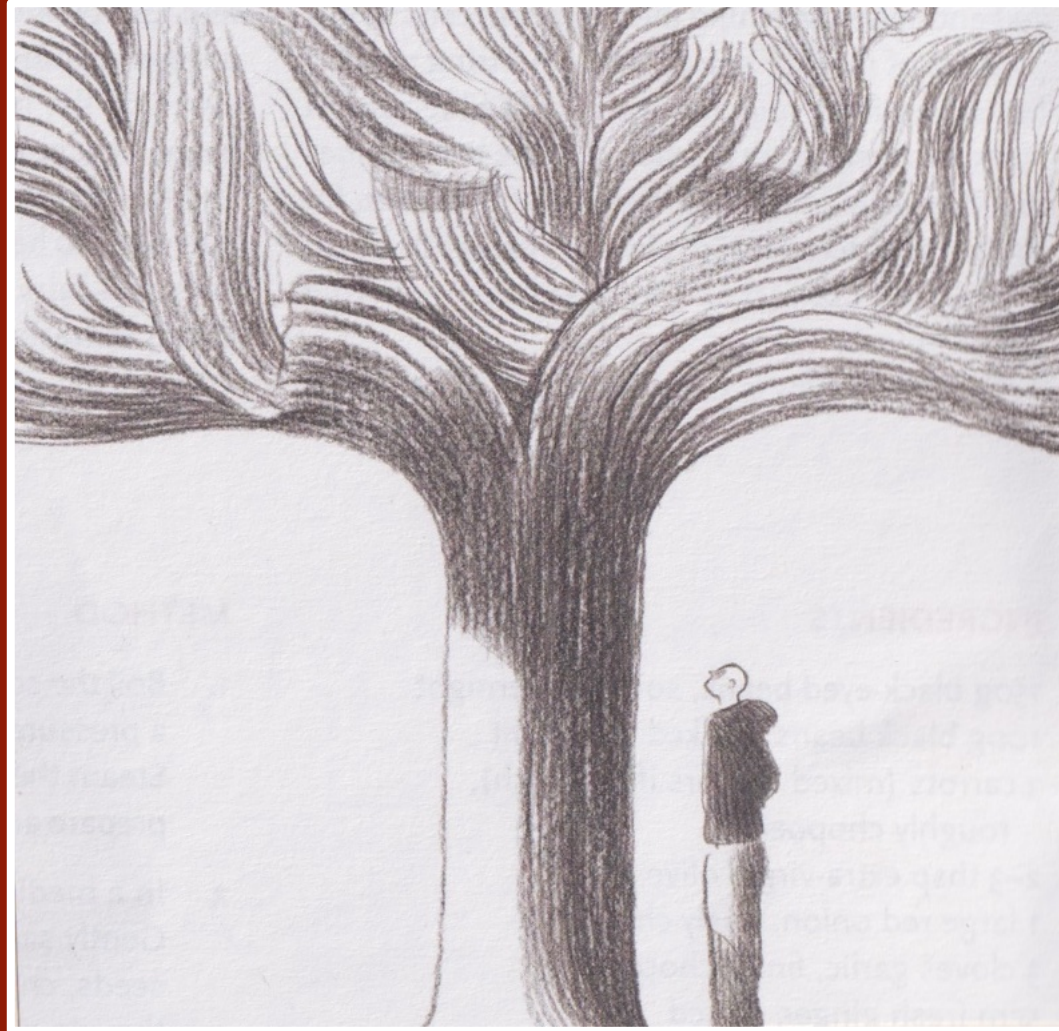

... revealing the essence...

... being able to change your mind...

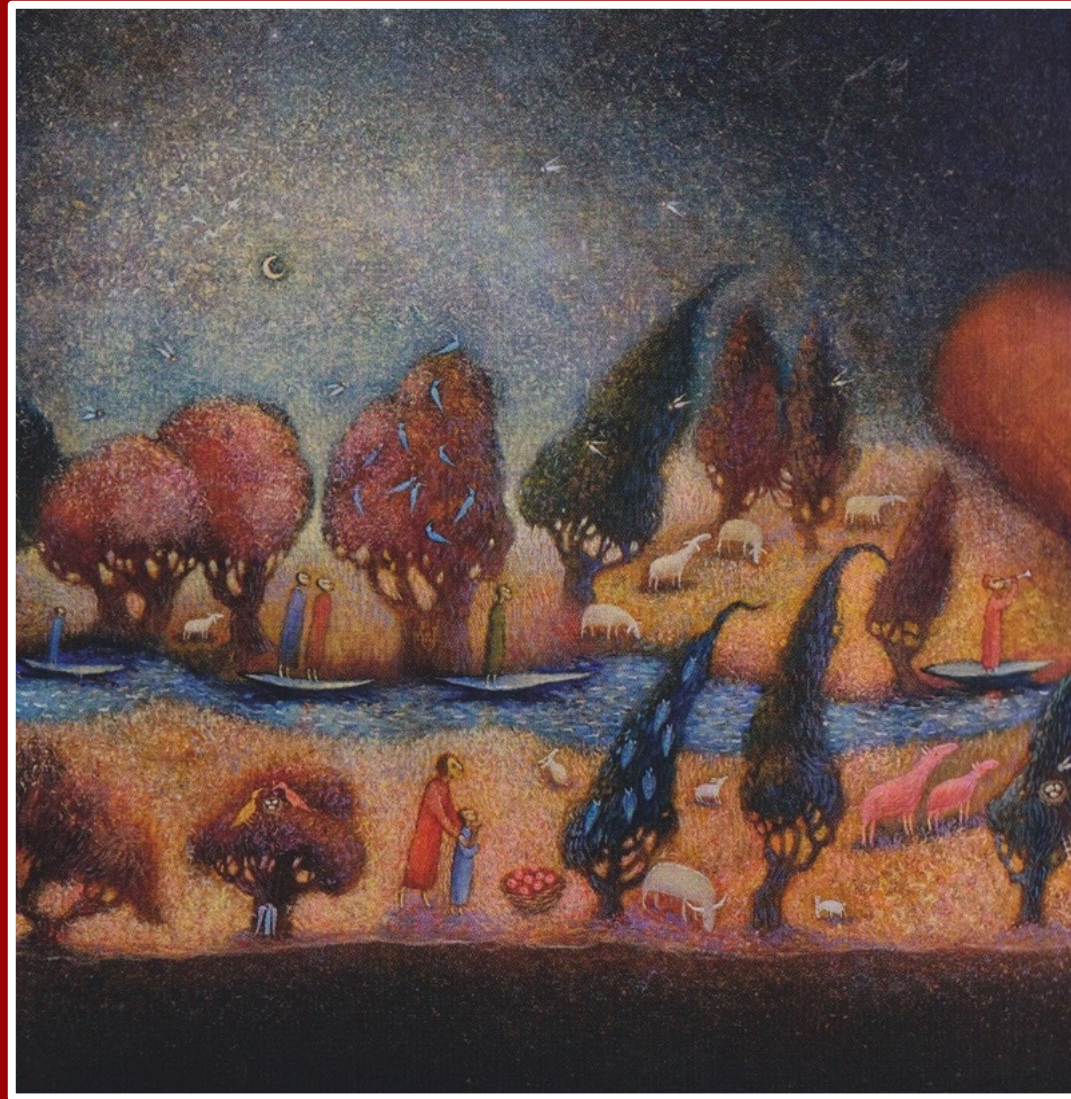

...going with the flow...

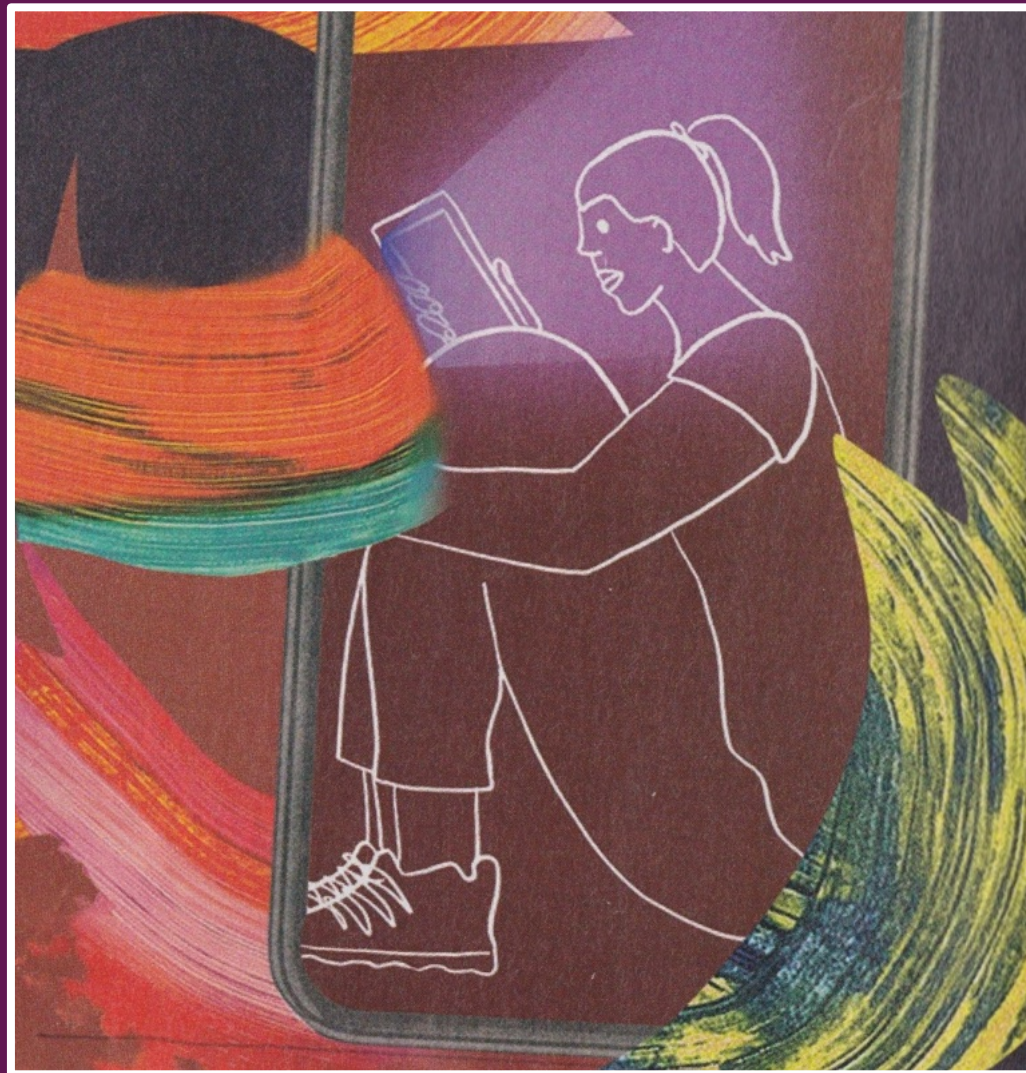

... feeling empathy...

... holding space for a more instinctive response...

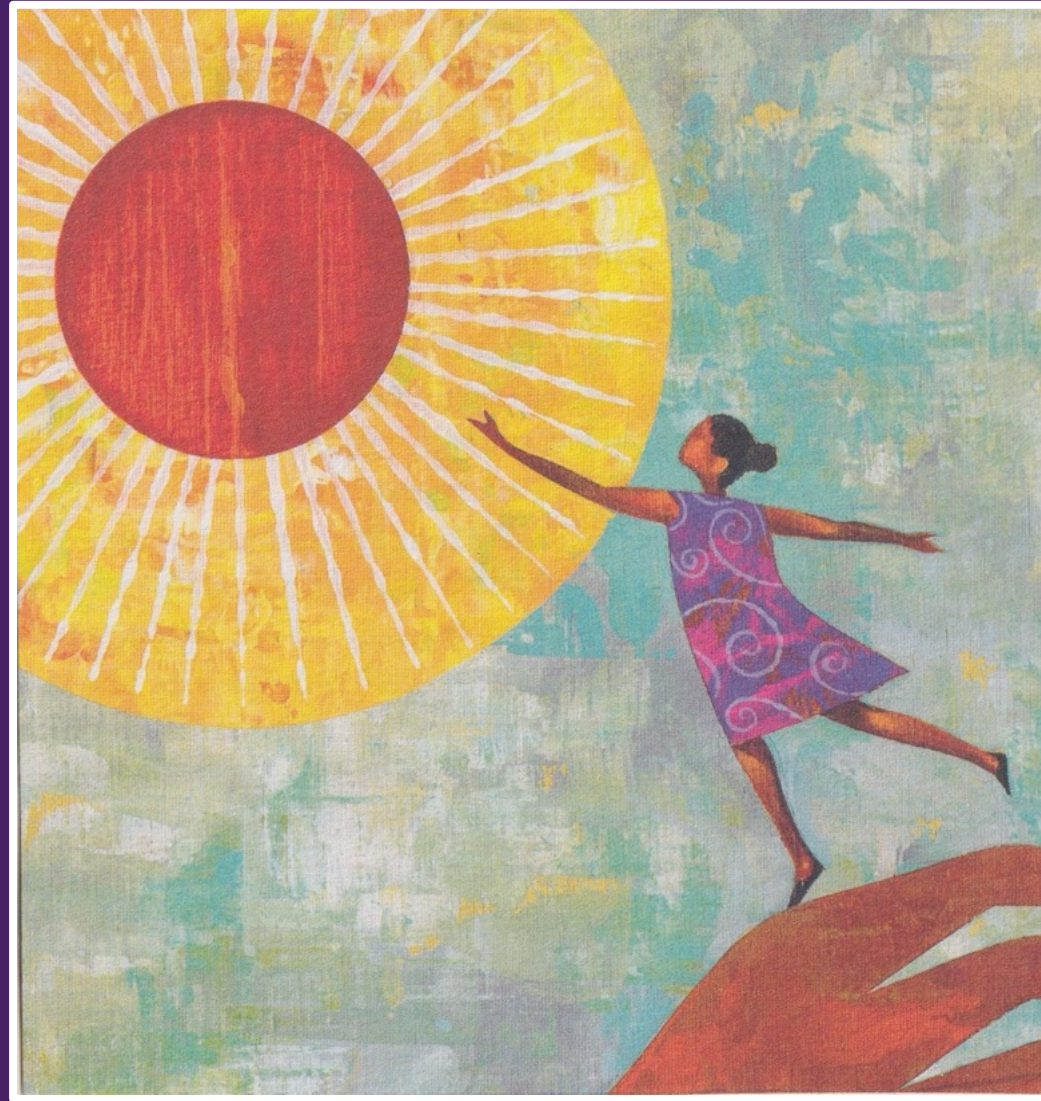

... growing the story...

... being prepared to wait...

... letting the path emerge...

... so that just sometimes you almost touch the sun.
